Bio 304: Tips for debugging your code!

Paul M. Magwene

What does this code do? Where's the bug?

```r
ggplot(iris,aes(x=Sepal.Width,y=Sepal.Length))+geom_point(
aes(color=Species),alpha=0.5,size=1)+labs(title=
"Sepal morphology in the Iris genus", x="Sepal Width (cm)",
y="Sepal Length (cm)"),+facet_wrap(~Species)
```

What does this code do? Where's the bug?

```
ggplot(iris, aes(x = Sepal.Width, y = Sepal.Length)) +
  geom_point(aes(color = Species),
             alpha = 0.5, size = 1) +
  labs(title = "Sepal morphology in the Iris genus",
       x = "Sepal Width (cm)",
       y = "Sepal Length (cm)"), +
  facet_wrap(~ Species)
```
